

DISINFECT YOUR BUSINESS TODAY

If you're like most businesses, the coronavirus and COVID-19 have taken a major toll on your ability to serve your customers. It's an unprecedented and extremely stressful time, for businesses especially, and we all need to do our part to help.

One of the most important things we can do is keep the places where people shop, eat and work as sterile as possible. **Orkin® VitalClean™ can help.**

DISINFECTION YOU CAN TRUST

With so many misleading claims out there, you need a partner you can trust. The Orkin® VitalClean™ service uses a powerful but eco-friendly disinfectant on EPA's "List N" of products for use against the coronavirus that causes COVID-19.

A Proven Disinfectant

- The Orkin® VitalClean™ service uses an EPA-registered disinfectant labeled for use against a wide variety of pathogens and included on EPA's "List N" of products that meet their criteria for use against SARS-CoV-2, the coronavirus that causes COVID-19.
- When applied at full strength in accordance with the product label, this powerful disinfectant will kill 100% of bacteria and viruses on hard, non-porous surfaces and will also sanitize soft, porous surfaces.

Minimal Environmental Impact

- The disinfectant product we use is rated by the EPA as Toxicity Category IV, their lowest toxicity rating, defined as "practically non-toxic and not an irritant."
- It contains no ozone-harming volatile organic compounds (VOCs), and is mild on skin, hard surfaces and fabrics.
- For foodservice facilities, it is rated "no rinse required on food contact surfaces" category D2 by NSF International. This means it is approved for use in commercial or residential kitchens to control bacteria, viruses and mold without the need to wash/rinse the area with water after application.

ORKIN® VITALCLEAN™ KILLS 100% OF BACTERIA AND VIRUSES ON HARD SURFACES.

Applied by Essential Service Professionals You Can Trust

- Orkin is one of the few “essential service” providers designated by the U.S. Department of Homeland Security so we’re able to continue servicing your business during these unprecedented times. We take this responsibility very seriously and feel it’s our duty to do what we can to help our customers.
- Our number one priority is the protection of our employees and customers. We follow CDC guidelines on social distancing and maintain a minimum 6-foot distance from others during the course of business.
- Orkin has been using this same product for years to sanitize and disinfect commercial locations after pest cleanouts, so we’re ready to get to work.
- Orkin has more than a century of experience protecting customers and their reputations, so you can rest assured you’ll receive effective service delivered by well-trained technicians.

HOW IT WORKS

Trained technicians carefully wipe down all high-touch surfaces in a given location, then apply a misting application using specialized equipment, and let it dry undisturbed for 10 to 15 minutes. Once the product application has dried, the label assures 100% disinfection of all bacteria and viruses on hard, non-porous surfaces and will also sanitize soft, porous surfaces.

The VitalClean™ service is best rendered after hours or when the building is unoccupied. In 24-hour facilities or other businesses that need to remain open during service, we can designate and treat zones in rotation to allow most operations to continue during the service.

LET'S GET BACK TO BUSINESS

There's no silver bullet for completely stopping the spread of COVID-19 yet, but Orkin® VitalClean™ can help you reduce the risks and restore a safer and healthier environment so you can get back to business.
